

Procore / Esticom Integration FAQ

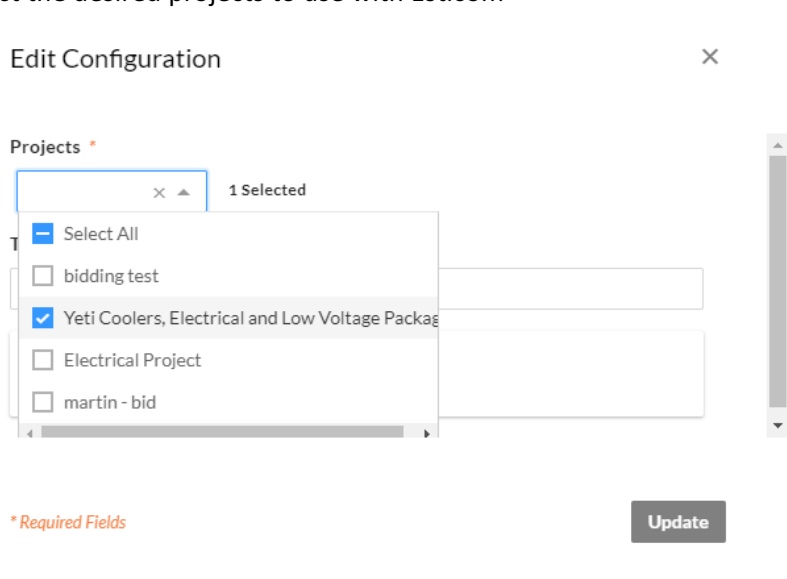

Why isn't Esticom showing up as an available "Embedded Application" in Procore?

Embedded Applications have to be granted permission for each project in Procore. In order to grant access:

- Select 'App Management' from the 'Application Selection' pulldown

- Select 'Configurations'
- Edit the Esticom configuration
- Select the desired projects to use with Esticom

Can I use the Integration without a paid Esticom subscription?

Yes! Esticom offers a free 14 day trial for Procore customers to evaluate. No credit card is required to trial, and you may cancel at any time.

Can I send marked-up plans back into Procore?

Not yet, but this will be planned for a future release

How can I purchase an Esticom subscription?

You can sign up directly in the application on the *License* page, or email sales@esticom.com to discuss volume license options with a sales representative

Where is my data stored?

All of your information is stored within United States regions of Microsoft's Azure datacenters. Esticom's privacy policy is available here: <https://www.esticom.com/privacy-policy/>
