

# Remotely Control & Monitor On-Site Heaters with SmartHeat

# WEDGE™

powered by *United Rentals*

**WEDGE SmartHeat will automatically cycle on and off jobsite heaters, decreasing labor costs and reducing fuel consumption for a more efficient and sustainable worksite.**

## REMOTE MONITORING

- Adjust the climate at your jobsite remotely from your PC, phone or tablet
- SmartHeat does the heavy lifting for you, only cycling the heater on as needed
- Wireless sensors and instant alerts add an additional layer of visibility

## REDUCE COSTS

- Reduce fuel consumption - heaters run when they need to according to set scheduling
- Personnel are alerted to power losses or changes in temperature - no need to be on site 24/7

## LOCAL FIELD SUPPORT

- In-person or virtual training and a dedicated WEDGE specialist provides peace of mind

*“The system saves us a ton of time from having to walk around to take readings.” - WEDGE customer*

## Reduce your Carbon Footprint & Increase Fuel Savings This Season

The WEDGE SmartHeat system is easily installed by our technicians on select United Rentals heaters and will cycle on and off automatically to maintain pre-set temperature conditions, eliminating the need to run heaters 24/7. Save on fuel costs, create a more sustainable worksite and reduce the need for after hours checks.

WEDGE sensors add an additional layer of visibility on large jobsites by recording temperature readings and sending data wirelessly to your custom dashboard . Easily set threshold alerts to notify you and your team if conditions exceed pre-set limits, create custom reports based on data collected and use this information for reporting and quality assurance.

**Create a more sustainable jobsite and take control of fuel consumption this season.**
