

CoreStart Professional Services

This package is designed to provide flexibility to you and your teams while getting you off to a strong start during the first 12 weeks with Procore and will help accelerate time to value. This package is designed to cover the tools within the Premier Product bundle, or two add-on product licenses. The implementation timeline is 12 weeks after service start date.

Services Included:

Named Project Manager

Your Procore Project Manager is available for up to nine (9) hours of implementation effort, which includes call time, as well as administrative time, to consult on how to make Procore work for your business, discovery of current workflows and desired improvements, company level configuration review, and outcome review.

Expert Product Consultation.

Up to fourteen (14) hours of Product consultation efforts, which includes calls and administrative prep and follow-up time. These consultations are provided by subject matter experts with specific product and/or industry knowledge, assist with product adoption, and ensure your use of these products aligns with a business outcome. These sessions provide consultative guidance on best practices, configuration settings, train-the-trainer sessions, or general Q&A with your internal team.

Add-On Services

Services in addition to those included in this service package—such as an extension of CSM support services beyond twelve (12) weeks, additional Consulting Services hours, Custom Solutions hours, On-Site or Virtual all day training or Custom Integration Services—are available upon request to ensure you have all the support needed to be successful. These services are available for a fee and are not included in this scope.

Pricing and Payment Terms

These bundled services are offered at a discount from market rates. Work performed against this services bundle will be conducted via a fixed fee and is due as defined in the order form.

Professional Services provides expertise, capacity, and processes to optimize your use of Procore.

- Maximize investment
- Increase user adoption
- Improve organization efficiency
