

What's New In Procore

Here's what we've been up to from April 2019 - June 2019

FEATURED UPDATES

PROJECT MANAGEMENT

Daily log calendar view

Quickly view daily log completion and the status of entries one month at a time—eliminating the hassle of navigating between different dates to verify whether they have been filled out and marked as complete. [Learn more.](#)

PROJECT MANAGEMENT

Search across all drawings

Enter keywords or phrases through the search bar, and quickly find exactly what you are looking for on a drawing. Users can search specific terms such as 'bike rack' to see every location it appears on a drawing or users can search more general terms like 'electrical panel' in order to see the total count on a specific drawing. [Learn more.](#)

FINANCIALS

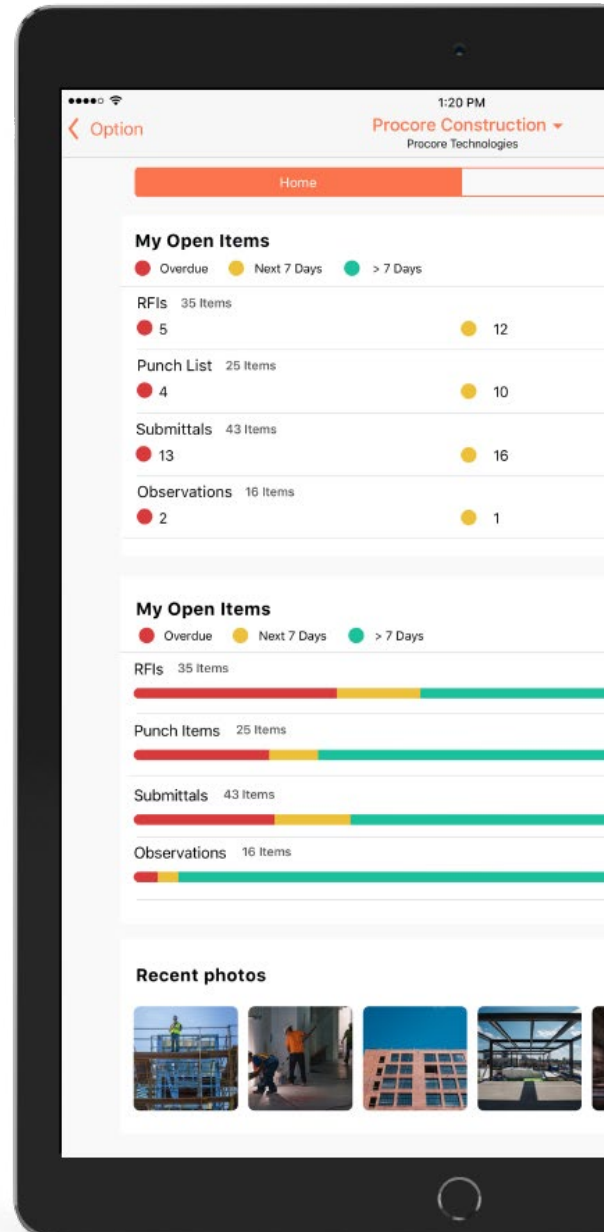

Eliminate double entry and streamline your AP workflow

Procore Invoice Management is now integrated with QuickBooks Desktop, enabling project teams to streamline their invoicing process and get subs paid faster. [Learn more.](#)

NEW PRODUCT

Design Coordination

Bridge the gap between VDC teams, the entire project team, and coordination technology solutions. This new product integrates the process of 3D coordination into Procore in a centralized location. Elevate coordination issues directly to RFIs and improve project performance and predictability through a streamlined coordination process. [Learn more.](#)

What's New In Procore

Here's what we've been up to from April 2019 - June 2019

PROJECT MANAGEMENT

Document tagging

Easily locate files of certain categories or types from a single location. Instead of needing to navigate back and forth between different folders or create duplicate files to exist in multiple folders, you can now create tags to help categorize project documents. [Learn more.](#)

QUALITY & SAFETY

Additional response types within inspections

With the addition of text, numerical, and date responses within the Inspections tool, you can achieve a higher level of control, flexibility and, more importantly, reporting across your checklists. [Learn more.](#)

Report on environmental observations

Open up your safety program to include capturing environmental observations. This new category will help you keep them separate from your other Observation types for reporting purposes. [Learn more.](#)

FIELD PRODUCTIVITY

Streamline your time entry approval process

Across all projects, you can now edit, review, and approve employee time entries for the week with the new Company level Timesheets tool. [Learn more.](#)

FINANCIALS

Track potential revenue throughout the change management process

Our new Change Event Revenue feature allows you to view the full financial effect of a change from beginning to end by tracking its revenue implications alongside the cost impact. [Learn more.](#)

OTHER UPDATES & ENHANCEMENTS

Conveniently access your Outlook emails and attachments

With our new Microsoft Outlook connector, you can now view all your Outlook emails from your Procore email tab and file attachments to your Documents tool. [Learn more.](#)

Additions & updates to the App Marketplace

Our newest integrations include: Procore for Outlook, Tools for Trade by Riskcast, Gmail Add-on (Procore Built), Microsoft Project Desktop Sync, Microsoft Project Online Sync, MYOB with OneCore, HoloLive/MobiLive by VisualLive, Sage 100 Contractor Timesheet Integrator, and 360 Sync for Windows.
