

## How to install or upgrade DESTINI Estimator

The purpose of this article is to provide all the necessary information to initially set up or upgrade DESTINI Estimator on the user desktop.

### Installing Estimator Package

These are the programs that are packaged with Estimator.

- Microsoft .Net Framework 4.7.2
- Microsoft Visual C++ 2015 Update Redistributable
- SQL Express 2014 with advance features for search
- DESTINI Data Manager (manages the Cost database)
- Client Broker (Licensing – Uses Individual or Network license)
- DESTINI Estimator Application (DESTINIData "Jobs" database)

**During the install of Microsoft .Net Framework your computer may ask to Restart before finishing the set up, this can wait until after the application package is installed. If you bypass the Restart then click the Estimator.exe to re-run the setup until Finish then restart the computer.**

### **Important install notes:**

- Admin right is required to install or upgrade the application
- If Microsoft Visual C ++ 2015 Redistributable pop up with an error, please click OK and continue to install.
- The below image is the SQL Express features that are installed. If SQL Express failed to install correctly, then more than likely it's because you have **Pending Windows Updates** and may need to do a **Restart**. Please run Windows Updates, then **Restart**

Name

- Microsoft Visual C++ 2010 x64 Redistributable - 10.0.0.4958
- Microsoft SQL Server 2014 Setup (English)
- Microsoft SQL Server 2012 Native Client
- Microsoft SQL Server 2008 Setup Support Files
- Microsoft SQL Server 2014 Transact-SQL ScriptDom
- Microsoft ODBC Driver 11 for SQL Server
- Microsoft VSS Writer for SQL Server 2014
- SQL Server Browser for SQL Server 2014
- Microsoft Visual C++ 2010 x64 Redistributable - 10.0.0.4958
- Microsoft Visual C++ 2015 Redistributable (x64) - 14.0.23133
- Microsoft SQL Server 2014

- If a user mistakenly didn't realize during the setup that SQL Express failed and continue to install the application, then the user can uninstall Data Manager only, **Restart** their computer, then re-run the Estimator.exe setup from the Download Folder to reinstall SQL server and Data Manager.

Here are the screen shots of each steps in order after you double click on the .exe file, just follow the Wizard until Finish.

### Upgrading the applications

Upgrading works similar to installing the application. There is ***no need to uninstalling the older versions***; download and run the Estimator.exe file and follow the wizards until Finish similar to the screenshots above. It will upgrade both Data Manager (if required) and Estimator.

If you are still having issues then contact [Support@beck-technology.com](mailto:Support@beck-technology.com) for assistance.
