Daily Log (iOS)

About Daily Log

The Daily Log tool at the Project level is designed to give your field team a simple platform to log and share information on a construction job site, each and every day of the job.

Key Benefits include:

- Record daily jobsite activities that can be seen by the team in real-time
- Track weather conditions
- Improve labor productivity
- Archive data to access at any time
- Enter or view information in your daily log from a mobile device out in the field
