Punch List (iOS)

About Punch Lists

The Punch Lists tool at the Project level is designed to maintain a clear list of issues while assigning responsibility of an item to a specific person at a specific company, selecting a due date for an item, and tracking an item’s current status.

Key Benefits include:

- Create and manage punch list items from smartphones, tablets, and computers
- Assign a user from a specific company to an item
- Create a due date with automatic overdue emails
- Drop Punch List items directly to drawings
- Filter by status (open, closed or pending)
- Maintain real time history of all actions
